WHITE MULE CAUSE OF THREE ARRESTS

Carl Robinette of North Vernon, Arline Cueno of Ripley County, Bert Morris of Carthage in Jail

"PARALYZED" BY BOOZE

Morris and Cueno Fined \$50 and Get Four Months Sentence—Robinette Pays a Fine

"White mule" figured in the arrest of three persons Sunday, terminating several episodes which were reported to the police. Those placed in jail were Carl Robinette of North Vernon, Arline Cueno of Ripley county and Bert Morris of Carthage.

Morris and Cueno were arraigned this afternoon before Judge Sparks in the circuit court on charges of unlawful possession of liquor, and each pleaded guilty. They were given \$50 fines and each was given four months sentences at the state penal farm.

Robinette was arrested Sunday afternoon by Patrolman Lakin, and was "paralyzed" by the effect of the white mule. He appeared this morning in police court and was given a fine of \$5 and costs by Mayor Thomas, which he paid.

Morris and Cueno were arrested near Occident Sunday night after supper. The people residing in that neighborhood were unable to locate the county officers, and sent a call into police headquarters here.

Patrolman Nicholson and Fireman Downey went to the place and the two men were said to be "unconscious" and were practically blocking traffic along the road.

They were in Morris' machine, and the officers found two quart bottles of "white mule" in the machine. They were brought to jail here and today charges of unlawful possession were filed against them in the circuit court.

Under the law the machine was seized and because it contained liquor, it will probably be turned over to the federal officers, where it will be sold at auction, according to the law.

Before the two men were arrested, the police had received numerous complaints in the afternoon that they were driving about the city, and were endangering the lives of people by their reckless driving. They could not be located by the police and managed to escape, until they were compelled to stop near Occident.

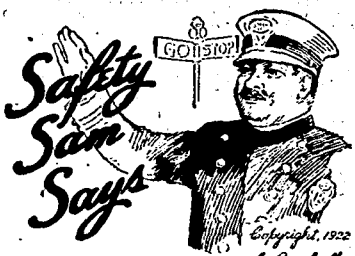

The two men are said to be employed by the American Paper Products Company at Carthage.

The Rush county grand jury was called today to begin a session Tuesday morning, and several matters may be probed.

The night patrolmen were called Sunday morning about two o'clock

SAFETY SAM

Wrecks of flivvers oft remind us
It is little short of crime
To forge on the headlamps blind us
Hoping thus to make up time.

MACHINES COLLIDE, NO SERIOUS DAMAGE

Touring Car Belonging to Elsherry
Pea Runs Into Roadster of Connersville Man

WOMAN IN LATTER CAR FAINTS

Two automobiles collided at the intersection of Second street and Buena Vista Avenue Sunday afternoon, but no serious damage was done. A large Haynes touring car, belonging to Elsherry Pea and driven by a Sorrell boy, ran into a Buick roadster, driven by W. S. Suttles of Connersville.

The touring car was going west in Second street as the roadster, which was going east, came out of the avenue. It is thought the driver of the touring car became excited and ran into the Suttles car. The roadster was forced upon the curbing in front of the Wallace residence in Second street, but no damage was done except a broken running board.

Mrs. Suttles who was with her husband, fainted as the result of the collision, and was taken into E. C. McMahan's home, and a physician summoned. She soon revived and was able to return to her home in Connersville, with her husband.

CHRISTIANS ATTACKED BY HORDES OF TURKS

Victorious Army Invades Pera, European Center of Constantinople, Pillaging and Killing

GREEK THRONE IS IN PERIL

(By United Press)
Constantinople, Greece, Sept. 11—Christians were attacked by a horde of Turks, who invaded Pera, the European center of Constantinople, pillaging and destroying shops and dwellings. Several police were killed trying vainly to defend the Christians.

London, Sept. 11—Victorious Turkish Nationalist troops are pouring into Smyrna today, while mutterings of Christian massacres stir the Moslem world as a result of Mustafa Kemal's crushing victories over the Greeks.

King Constantine of Greece is in peril of being overthrown, according to dispatches from Athens. Riotous remnants of the defeated Greek army are marching through the streets, hooting their king.

A "strong man" is needed in Greece, and adherents of former premier Venizelos are understood to favor his immediate return which would involve ousting Constantine. Venizelos was due in Paris today to consult Allied statesmen.

First note of a possible Islamic uprising against the Christians was sounded in Constantinople where, upon word of Kemal's successes, throngs of Moslems congregated and threatened the "unbelievers". Christians are in grave fear.

SUIT FOR POSSESSION

Robert B. Cook is plaintiff in a suit filed today in Justice Stech's court against John Senter's, the complaint being for possession of property and \$50 damages. The case has been set for trial on September 16, at 9 o'clock.

EFFORT TO IMPEACH DAUGHERTY STOPPED

Proceedings Started in Congress by Representative With Grievance Against Justice Department

IT WILL DIE IN COMMITTEE

(By United Press)
Washington Sept. 11—A movement to begin impeachment proceedings against Attorney General Daugherty was frustrated by republican leaders in the house today before it was fully under way.

A resolution demanding the institution of formal impeachment against Daugherty was introduced by Representative Keller of Minnesota.

Following several objections, Keller was compelled to read his charges first and then present his resolution. When he asked adoption of the resolution, Republican Speaker Gillett held that he had automatically released the floor and prevented him from continuing with his speech.

Republican Leader Mondell then moved that Keller's impeachment resolution be referred to the house judiciary committee, claiming this was the formal procedure.

The resolution is certain to be killed speedily or allowed to die without action by the committee where an administration majority holds sway, it is said.

Attorney General Daugherty said today, he was not "at all disturbed" by the impeachment proceedings brought against him in the house by Representative Keller. "Mr. Keller has a grievance based on facts that he could not control the department of justice in a case in which he was personally interested," the attorney general said.

\$1,035.36 IN CASH AND CHECKS TAKEN

Pilfering of Alexander and Company Garage Safe is Discovered Saturday Night

ONLY \$50 OF LOOT IN CASH

Robbery Evidently Took Place During Supper Hour When One Man Was in Charge

The safe of the Alexander and Company garage, corner of Second and Morgan streets, was robbed early Saturday night, and the contents of the money drawer, reported to have contained \$1,035.36 were taken, with no clue as to the theft.

The robbery is believed to have taken place during the supper hour, between six and seven o'clock, when only one person was in the office. Louis Moore, who was in charge, stated that he was called to the front several times to sell gasoline, and that in all probability the robbers made their haul while he was out.

The safe was closed and on the half lock. The person who opened it evidently knew the combination to open it, and after taking the loot, closed it, and turned the combination on the half lock again.

The \$1,035.36 was mostly in checks, and only about \$50 was in cash, according to the proprietors, George Alexander and Virgil Maffett. The firm immediately ordered the banks to stop payment on the checks. The theft was not discovered until about 9:30 Saturday night, as the business of the garage is carried on with a cash register, and the money then transferred to the safe.

FIRE DUE TO SHORT CIRCUIT

A Ford touring car belonging to James Moore, 1015 North Perkins street, was slightly damaged by fire Sunday evening about 7:30 o'clock, when a short circuit is believed to have set it on fire. The machine was near the I. & C. Traction station, and the chemical truck from the fire department was called and the blaze extinguished before the fire gained headway.

WINS 7 FIRSTS IN JERSEY CLASS

With Only Six Head in His Herd, John F. Boyd Takes Prizes in Open and State Events

HEAVY STATE FAIR WINNER

Chris King is Awarded More Than Score of Ribbons With Apples in Horticulture Department

With six head of imported Jerseys, John F. Boyd of this city won seven first prizes at the Indiana state fair in Indianapolis last week, five of them in the classes for Indiana herds, and two of them in classes open to the world. He also brought home several other prizes.

Chris King, living south of Rushville, also was a large prize winner in the horticulture department with his apple and other fruit entries.

In the classes limited to Indiana herds, Mr. Boyd took the following first prizes: two-year-old bull, junior bull calf, three-year-old cow, senior yearling heifer and graded herd, and fourth in produce of cow.

In the open event, his entry was second against five others in the class for two-year-old bulls; second against twelve other entries in the class for junior bull calves; first in the three-year-old class with twelve other entries; first in the class for senior yearling heifers with nineteen showing against him and third in the class for graded herds with seven other entries.

Charles M. Trowbridge of Woodland farm, near Mays, won the most coveted prize in the Duroc hog classes at the state fair. He was 1st in the "get of sire", which includes four animals sired by one hog. His entries had to compete against thirty-one herds in the ring. Other prizes brought home by Mr. Trowbridge were first for senior yearling sow, second and fourth for aged sows, third for junior yearling sow and sixth on spring litter.

Mr. King won the following prizes:

In the class for commercial varieties of apples displayed in trays, he was first in Northern Spy, second in Rome Beauty and first in Wealthies.

In the plate display of commercial varieties, he was second in the Benoni class, first in Baldwin, first in Gane, second in Rome Beauty, first in Rhode Island Greening, first in Stayman Winesap, and second in Wealthies.

In the general apples list, shown in trays, the Rush county man was first in Chenango, second in Oldenburg, second in Fallowater, second in Indiana, first in King, first in Rambo, first in Venevere and first in Wagener.

In the general list, displayed in plates, he was first in Canada Red, first in Chenango, second in Fallowater, first in Hubbardston, second in Indiana, first in Maiden Blush, first in Moores Sweet, first in Peck's Pleasant, first in Oldenburg, second in Rambo, second in Roman Stem, first in Thompsons King, first in Vandevere, first in Wagener, first in Westfield, and first in Washington Strawberry.

In the classes for plums, shown in plates, Mr. King was second in the Blue Damson, and first in Moore's Arctic.

GIVES BOND FOR \$50 TODAY

Clarence Weidner, Accused of Fish Law Violation, Appears

Clarence Weidner appeared this morning in circuit court and gave bond amounting to \$50 on a charge of unlawfully catching fish. The defendant is one of four who are charged with similar affidavits. The others appeared at the opening of the term.

Frank Farley today dismissed his suit for divorce from Mary Farley, which he filed during the vacation term of court.

The jury commissioners have been ordered to draw an additional list of ten names to fill the regular panel.

BACK FROM EUROPEAN TOUR

Mrs. J. D. Case and Son and Mrs. Martha Grindle Return Home

Mrs. J. D. Case and son Deryl and Mrs. Martha Grindle returned to their home in this city Sunday from spending the summer abroad. The party was included in the itinerary of Near-East-European tour, which started May 20 from New York City on the S. S. "Presidente Wilson."

They traveled in Greece, Palestine, Egypt, Italy, Switzerland, Bavaria, the Rhine Country, Belgium, France and England. They sailed for their home in this city, September 2 on the S. S. "Aquitania," and arrived in New York on Sept. 8.

RETURNS SHOW HALF REGISTERED

Reports From Fifteen Precincts on Saturday's Registration Reveal 3,374 Enrolled

VOTE IN 1920 TOTALED 4,843

Women Outnumbered Men in Two Precincts—Two-thirds of Vote Registered in Some

With approximately half of the precincts of the county reported today, it appeared that more than fifty per cent of the normal vote of the county was registered at the first permanent registration of voters Saturday.

Inspectors from fifteen of the thirty-one precincts of the county had filed their returns at the county auditor's office today, showing a total registration of men and women voters in these precincts of 3,374.

In these same precincts in 1920, a total of 4,843 votes were cast for the candidates for president. The total vote for president in the county two years ago was 10,804.

More than twice as many men as women qualified for voting by registering Saturday. Early indications Saturday were that the registration would be very light, but the returns received so far show up differently.

In the fifteen precincts reporting today, 2,320 men and 1,054 women registered. In two precincts, Rushville No. 3 and Richland township, the women outnumbered the men in registering. Evidently a great deal of work was done among the women in the third precinct of Rushville township, for in this division 161 women and only 76 men registered. In Richland township, the score was 144 women and 141 men.

More than two-thirds of the normal vote in the first precinct of Center township is registered, there being 140 men and 121 women qualified for voting as compared with a vote of 373 for president in 1920.

About sixty per cent of the normal vote in the first precinct of Orange township is also registered. The registration report shows 124 men and 73 women, with a vote of 288 in 1920.

The registration in fifteen precincts is as follows:

Precinct	Men	Women
Walker—1	103	77
Rushville—5	45	43
Ripley—1	69	46
Ripley—2	75	44
Washington—1	52	23
Noble—1	60	46
Center—1	140	121
Orange—2	100	68
Walker—2	70	64
Rushville—7	72	51
Rushville—3	76	161
Richland	141	144
Rushville—8	81	45
Washington—2	58	48
Orange—1	124	73

SERVICES THIS WEEK

Special services will be held at the Church of God this week, the services beginning each evening at 7:30 o'clock. Charles Griffith of Bicknell, Ind., will have charge of the meetings and the public will be invited to hear him.

MASONIC MEETING

Phoenix Lodge No. 62, F. & A. M. will hold their regular stated meeting, Tuesday evening beginning at 7:30.

LAWYERS ATTACK ORDER BITTERLY

Attorneys For Striking Shopmen Denounce Writ as Unlawful and Unconstitutional

OUTSIDE INFLUENCE IS SEEN

Government's Attorneys Have Long Arguments Prepared That Will Will Require Days to Finish

(By United Press)
Chicago, Ill., Sept. 11—A bitter argument over the Daugherty injunction against the railroad shopmen's strike was waged throughout the day in federal court here.

Attorneys for unions bitterly attacked and denounced the writ as unlawful and unconstitutional assumption of illegal power by the courts.

A huge part of the government's lawyers headed by Attorney General Harry M. Daugherty upheld the writ and pleaded with Judge James H. Wilkerson to make the sweeping order permanent.

The court was urged to inquire into the private interests which may be behind the suit by Donald Richberg, union representative.

Richberg quoted many legal decisions, showing instances where suits brought under the name of the government were really found to be backed by outside influences, upon search of court inquiry.

When court recessed at one p. m., Richberg stated that it would take him another hour to finish citing legal opinion which he had ready to support his contention that the injunction should be dissolved.

Following Richberg's arguments, the government attorneys had long arguments prepared which may take days to finish.

There are also great store rooms filled with evidence, which they desire to present to the court. After the court battle was waged, the policy committee of the shop craft union, went into session again this afternoon to discuss proposals for settlement of the strike with individual roads. The morning meeting was adjourned immediately after they were called.

Bert M. Jewell, president of the shop crafts informed the committee of the details of separate peace arrived at in secret conferences with road executives.

Bitter opposition to the separate peace proposals was expected. The plans effect less than twenty-five per cent of the roads of the country. Representatives of 75 per cent of the shop men must yield the issue on "separate agreements" before the alleged peace can be ratified.

ENROLLMENT IN CITY SCHOOLS TOTALS 1075

Big Increase in All Buildings is Noted, Largest Being in High School

MAY NEED MORE TEACHERS

An unusually heavy enrollment marked the opening of the public schools in Rushville this morning, which was due probably to the entrance of students from outside of the city, and the total pupils enrolled in all buildings was 1075.

The greatest increase came in the high school, in both the Junior and Senior high schools, and the total enrollment here was 419 pupils today. In the Senior high school there were 248 pupils and in the Junior high, 171. The Senior high school showed an increase of about 45 this year and an increase of about 20 was noted in the Junior high.

The increases will probably cause additional teachers to be employed as the high school was crowded this morning. The primary grades also were unusually crowded in some of the buildings.

The enrollment by schools is as follows: Washington, 27; Havens, 161; Jackson, 224; Graham Annex, 244; Junior high, 171; Senior high, 248.

OPERATION ON MRS. HARDING DEFERRED

Improvement in Condition of President's Wife Reported in Bulletin Today

COMPLICATIONS SUBSIDE

Washington, Sept. 11—Continued improvement in the condition of Mrs. Harding has led attending physicians to postpone any operation, an official bulletin issued today stated.

The bulletin, issued by Brigadier General Sawyer at 10:15 a. m. stated:

"Temperature 99.5 degrees. Pulse 96.
"Respiration 30.
"Night less restless. Elimination increased. Complications subsiding. General conditions indicate improvement. Operation procedure deferred.
(Signed)

"C. Sawyer."

The phrase "elimination increased" referred to Mrs. Harding's increased ability to throw off effects of the poison and prevent further auto-intoxication.

HAS SCIENTIFIC BILL-MAKING PLAN

Thomas A. Edison Advises to Draw
up Skeleton of Bill First and
Specify Initial Thing

WOULD BE MONEY-SAVING

Testimony of Edison on Muscle
Shoals Power Project Before
Committee Published

By KENNETH W. CLARK
(U. P. Staff Correspondent)

Washington, Sept. 11.—Thomas A. Edison, inventive genius of the century, has offered a "scientific bill-making plan" to Congress.

This was learned by the publication of Edison's testimony on the Muscle Shoals, Ala., power and nitrate projects, before the senate agricultural committee.

"I worked in Washington during the war," the aged inventor told the committee. "I found out after a while that a lot of those fellows that were running the details of this government were false; they were not the real thing; they were counterfeits."

"I am surprised that you don't draw your bills differently," he continued. "Draw up a skeleton of your bill and specify the initial thing you have to do, and when that is done you will find out what the first step costs."

"Now, go ahead and continue it on by supplement, so you will know the progress of all your legislation and make them show up between each supplement. You would have saved five or six billion dollars here and you would not have got a lot of these inefficient people."

"It comes in sections and each time they come for more money you make an amendment to the act. Let them have it, but they have to show up."

"Under the war administration nobody had to show up. You will have it showed up by and by."

"You should always pass a bill that contains just the rudiments of the entire bill," Edison urged, "then you have the first start, the instrumentalities you start with to make that thing function, and spend several million dollars."

"When you have got through the first stage let them come to Congress and get the additional legislation to go ahead a little further and when you have got through an examination of what has been done you will know if there is anything rotten in that, because you will see how all the money has been spent."

"But the way you do it now you make the bill and quit and never hear anything, and you try to get some information and you don't get any at all. They double-cross you all the time."

13-MONTHS-OLD CHILD DIES

Hazel Downey, 13-months-old baby of Mr. and Mrs. Glen Downey, expired this afternoon about 12:30 o'clock at the home of its grandparents, Mr. and Mrs. Jesse Mathews in Circleville, death being caused from measles and complications. The baby was taken sick about four days ago, and continued to grow worse. The baby is survived by the parents and grandparents. The funeral services were not completed today.

EIGHT POUND BOY BORN

CIRCUIT WITH GRID LEAK RESISTANCE

Takes Place of "C" Battery— How Impedance of Flow Is Determined.

Fig. 13 shows a set of curves for a three-electrode vacuum tube circuit containing a grid leak resistance as shown in Fig. 11 instead of a "C" battery with the same symmetrical alternating difference of potential applied to the grid circuit.

There being no "C" battery potential applied to the grid, the grid in Fig. 11 is normally at zero potential with respect to the filament. As the positive half of the first cycle of the alternating difference of potential is impressed upon the grid circuit—see Fig. 13—the grid is made positive

with respect to the filament. Being positive with respect to the filament, causes a certain number of electrons, which are negative charges, to be attracted and caused to give up their negative charges to the grid. During the next or negative half of the cycle of the applied grid potential the grid is made negative with respect to the filament but does not lose the electrons again. Thus a negative charge is built up on a grid during the positive portion of each cycle, the cumulative effect of which is to produce a decrease of the plate current, during the period that the alternating difference of potential called a wave train is applied to the grid.

After the alternating difference of potential applied to the grid has ceased, the grid does not immediately lose its negative charge. The grid leak forms a high resistance path for the negative charge of the grid to leak off down to the filament, slowly. If no grid leak were used, the grid

would soon collect a sufficient negative charge to reduce the plate current to zero and the tube would cease to function.

A grid leak having too low resistance will not allow a sufficiently high negative charge to collect on the grid, resulting in a very small plate current reduction and weak response in the telephone receivers.

On the other hand, if the grid leak is of too high resistance, too high negative charge will collect on the grid and the condition of no grid leak will be approached.

In any electrical circuit that has a difference of potential applied to it, the current that will flow depends upon the "impedance" of that circuit; just as in the flow of water through a pipe, the quantity of water that will flow when any given pressure is applied depends upon how much the flow through the pipe is impeded by the friction of the particles of water against the sides of the pipe and against one another.

In the electrical circuit, the relation between these three quantities is that the current which will flow is equal to the applied differences of potential, divided by the impedance, where the current is in amperes, the applied difference of potential is in volts and the impedance in ohms. Or

transposing this equation the impedance is equal to the applied voltage divided by the current. The impedance of a vacuum tube plate circuit, internally between the filament and the plate, when the grid is at zero potential, is an important constant of a vacuum tube and is called the internal plate impedance.

The internal grid impedance of a vacuum tube used in a radio set as a detector determines the impedance of the telephones that will give best results when connected in the plate circuit of that particular tube.

It is then not only the resistance of a pair of telephones, but also the inductance and the distributed capacity of the winding that cause the maximum current to flow in the telephones for a given change in grid potential. The internal plate impedance of a vacuum tube varies only slightly with different plate voltage. It is more an inherent characteristic of the tube which is determined by the design.

AMUSEMENTS

Edna Murphy at Princess

How would you like to wear two hundred different hats in one week? To some women this would undoubtedly be an unalloyed delight. To Edna Murphy, however, it was just part of her day's work. Three or four years ago, she was a model for an advertising photographer. Her sense for the dramatic in posing soon led to screen engagements. She rose to stardom with William Fox following a big triumph in "Over the Hill".

Miss Murphy is seen in support of Agnes Ayres in "The Ordeal", the

new Paramount picture of this popular star which will be shown at the Princess Theatre today and Tuesday. "The Ordeal" is the first story to be written direct for the screen by W. Somerset Maugham, author of such big stage and novel successes as "Lady Frederick", "The Land of Promise", "The Circle", "The Moon and Sixpence" and "Of Human Bondage". Paul Powell directed while Beulah Murie Dix made the adaptation.

Grand Rapids—Fifty-nine Republican candidates sitting around the banquet table at the women's division of the Lincoln Republican Club here were not permitted to speak officially or otherwise.

Tractors Increase Farm Yield 25%

A RECENT report from a large number of Kansas farmers shows that they were able to plow an average of 2 inches deeper with tractors than with horses. Those who kept records claimed that this deeper plowing resulted in an increased yield per acre of 25%.

Power—petroleum power—is revolutionizing agriculture. Henry Ford says: "In the tractor, truck, automobile, and stationary gas engine—we have facilities that make farming enjoyable, profitable and worth while." Of all modern machines the tractor is one of the greatest blessings that has been devised for mankind. Fields cultivated by tractor-drawn plows produce more than fields turned by horse-drawn ones. Tractors make deeper plowing and sub-soiling possible. This, in turn, enables the ground to renew itself instead of gradually wearing out."

The Standard Oil Company (Indiana) appreciates the value of the tractor on the farm, and realizing that the use of the tractor is now in its infancy, is preparing to meet the resulting demand for gasoline; for highly specialized lubricants and other petroleum products needful to successful power-farming.

When the power-farmer needs petroleum products his need is urgent and the entire community is interested in seeing that these needs are supplied promptly.

One of the most vital services rendered by the Standard Oil Company (Indiana) is that of assuring the farmer at all times a constant, dependable supply of high quality petroleum products.

This Company is able to guarantee such a supply because of its modern, constantly expanding manufacturing and distributing facilities, its efficient organization and its knowledge of markets and economic conditions.

These are conditions under which great expansion, coupled with high centralization are indispensable to the performance of a service essential alike to the farmer and the general public.

MARY TO STEP OUT

Young, Three Republican Who
Leave on Account of Election—
How Mary is a S. C. P. Plan

By LAURENCE M. BENEDET
(U. P. Staff Correspondent)

Washington, Sept. 11.—The republican majority in the House is now devoting a good deal of its time (unofficially) to "internal politics."

Administration members back from a six weeks recess spent at home in the gentle art of trying to be renominated, are now playing the game of politics among themselves with the stakes the floor leadership and a number of important committee chairmanships in the next congress.

Voluntary retirements among the "old times" and involuntary retirements decreed by "fickle voters" in the primary elections that have been held thus far have already been so numerous as to necessitate an almost complete new deal in the republican organization in the lower branch. And the scramble is already on. The vacancies do not have to be filled until next March 4, when the new congress comes in, but by the time the problem of making the new selections will be only a matter of ratification. The "slate" is being made up now.

The majority party may lose heavily in the November election but the belief prevails here that it will retain control over the house and the reorganization to be effected next year will be worked out without any help from the democrats.

There is little real talk of putting up a man to contest with Speaker Gillett in the next congress and so the republicans are giving first thought to the position of floor leader, which Rep. Mondell, of Wyoming, vacates this year to either go to the Senate or retire. Several members are being prominently mentioned for Mondell's job, chief among them being Nicholas Longworth of Ohio; Sydney Anderson of Minnesota and Will R. Wood, of Indiana. Longworth seems to have the inside track and if he gets the place the son-in-law of the late President Roosevelt will at last step into the prominence his friends say he has long deserved.

Next in line, and probably first in real importance, comes the chairmanship of the powerful rules committee, which really decides what the house will do and when. The present chairman, Phillip Campbell of Kansas, was beaten for renomination Rep. B. H. Snell, of New York is the ranking republican member and will be promoted to the chairmanship.

The chairmanship of another important committee will be vacant, due to the retirement of Rep. Joseph Fordney, of Michigan. If the seniority rule is followed, Rep. Green of Iowa will ascend the gavel throne. Longworth is next in line.

The chairmanship of another influential committee may be vacant. Rep. Winslow, of Massachusetts is considering dropping out of politics. His wife wants him to and it looks like she'll win.

If there's any serious effort to unseat Speaker Gillett, the three members mentioned for the floor leadership probably will be the strongest candidates for the place. But at least one of them, Longworth, has said he would not enter a contest with Gillett.

The list of congressmen already scheduled to leave the House at the end of their present terms on March 4 includes 27 republicans, most of them wheelhorses of the party.

MEMORIAL

In sad but loving remembrance of her son Jacob Milton Somerville who departed this life one year ago, Sept. 11.

Beneath our eyes he faded slowly bearing sweetly all his sufferings without murmur or a wail. You are gone but not forgotten. Never shall your memory fade. Sweetest thoughts will ever linger around the grave where you are laid.

Sadly missed by his parents.
Mr. and Mrs. Willis Somerville

LICENSED TO WED

Charles Manning, a farmer of New Salem and Nellie Roberts, daughter of Mr. and Mrs. Mitchell Roberts of Rushville, were granted a marriage license here Saturday afternoon.

A GOOD FRIEND

A good friend stands by you when in need. Rushville people tell how Doan's Kidney Pills have stood the test. John Heany of 616 W. 3rd St., Rushville, endorsed Doan's many years ago and again confirms the story. Could you ask for more convincing testimony?

"I had trouble with my kidneys and the secretions passed too frequently and I had to get up several times during the night," said Mr. Heany. "It was painful to pass the secretions which were highly colored and contained sediment. My back was weak and lame. I got a box of Doan's Kidney Pills at Johnson & Co.'s Drug Store and they relieved me." (Statement given August 25, 1915).

On November 4, 1920, Mr. Heany added: "I still have the same high opinion of Doan's Kidney Pills. I use them occasionally and always get the same results."

60c. at all dealers. Foster-Milburn Co., Mfrs., Buffalo, N. Y.
